

The new EV4 Fastback

The EV4 Fastback represents the electrification of yet another important vehicle segment by Kia, as the brand introduces its first ever electric saloon car in Ireland. The EV4 Fastback is based on Kia's highly acclaimed EV architecture, adapted for the EV4's low profile and compact body style. The Fastback is 300mm longer and 5mm lower than the EV4 in Hatchback form, leading to a larger boot space of 490 litres and increased range of up to 633 kilometres.

Vehicle-2-Load (V2L)
Technology that allows you to charge and power your devices on the go.

In-Car entertainment
Watch your favourite show on Netflix and YouTube with Kia entertainment packages.

Wireless charging
Wireless phone charging comes standard on the Kia EV4.
