

The Kia EV4

Move in new light.

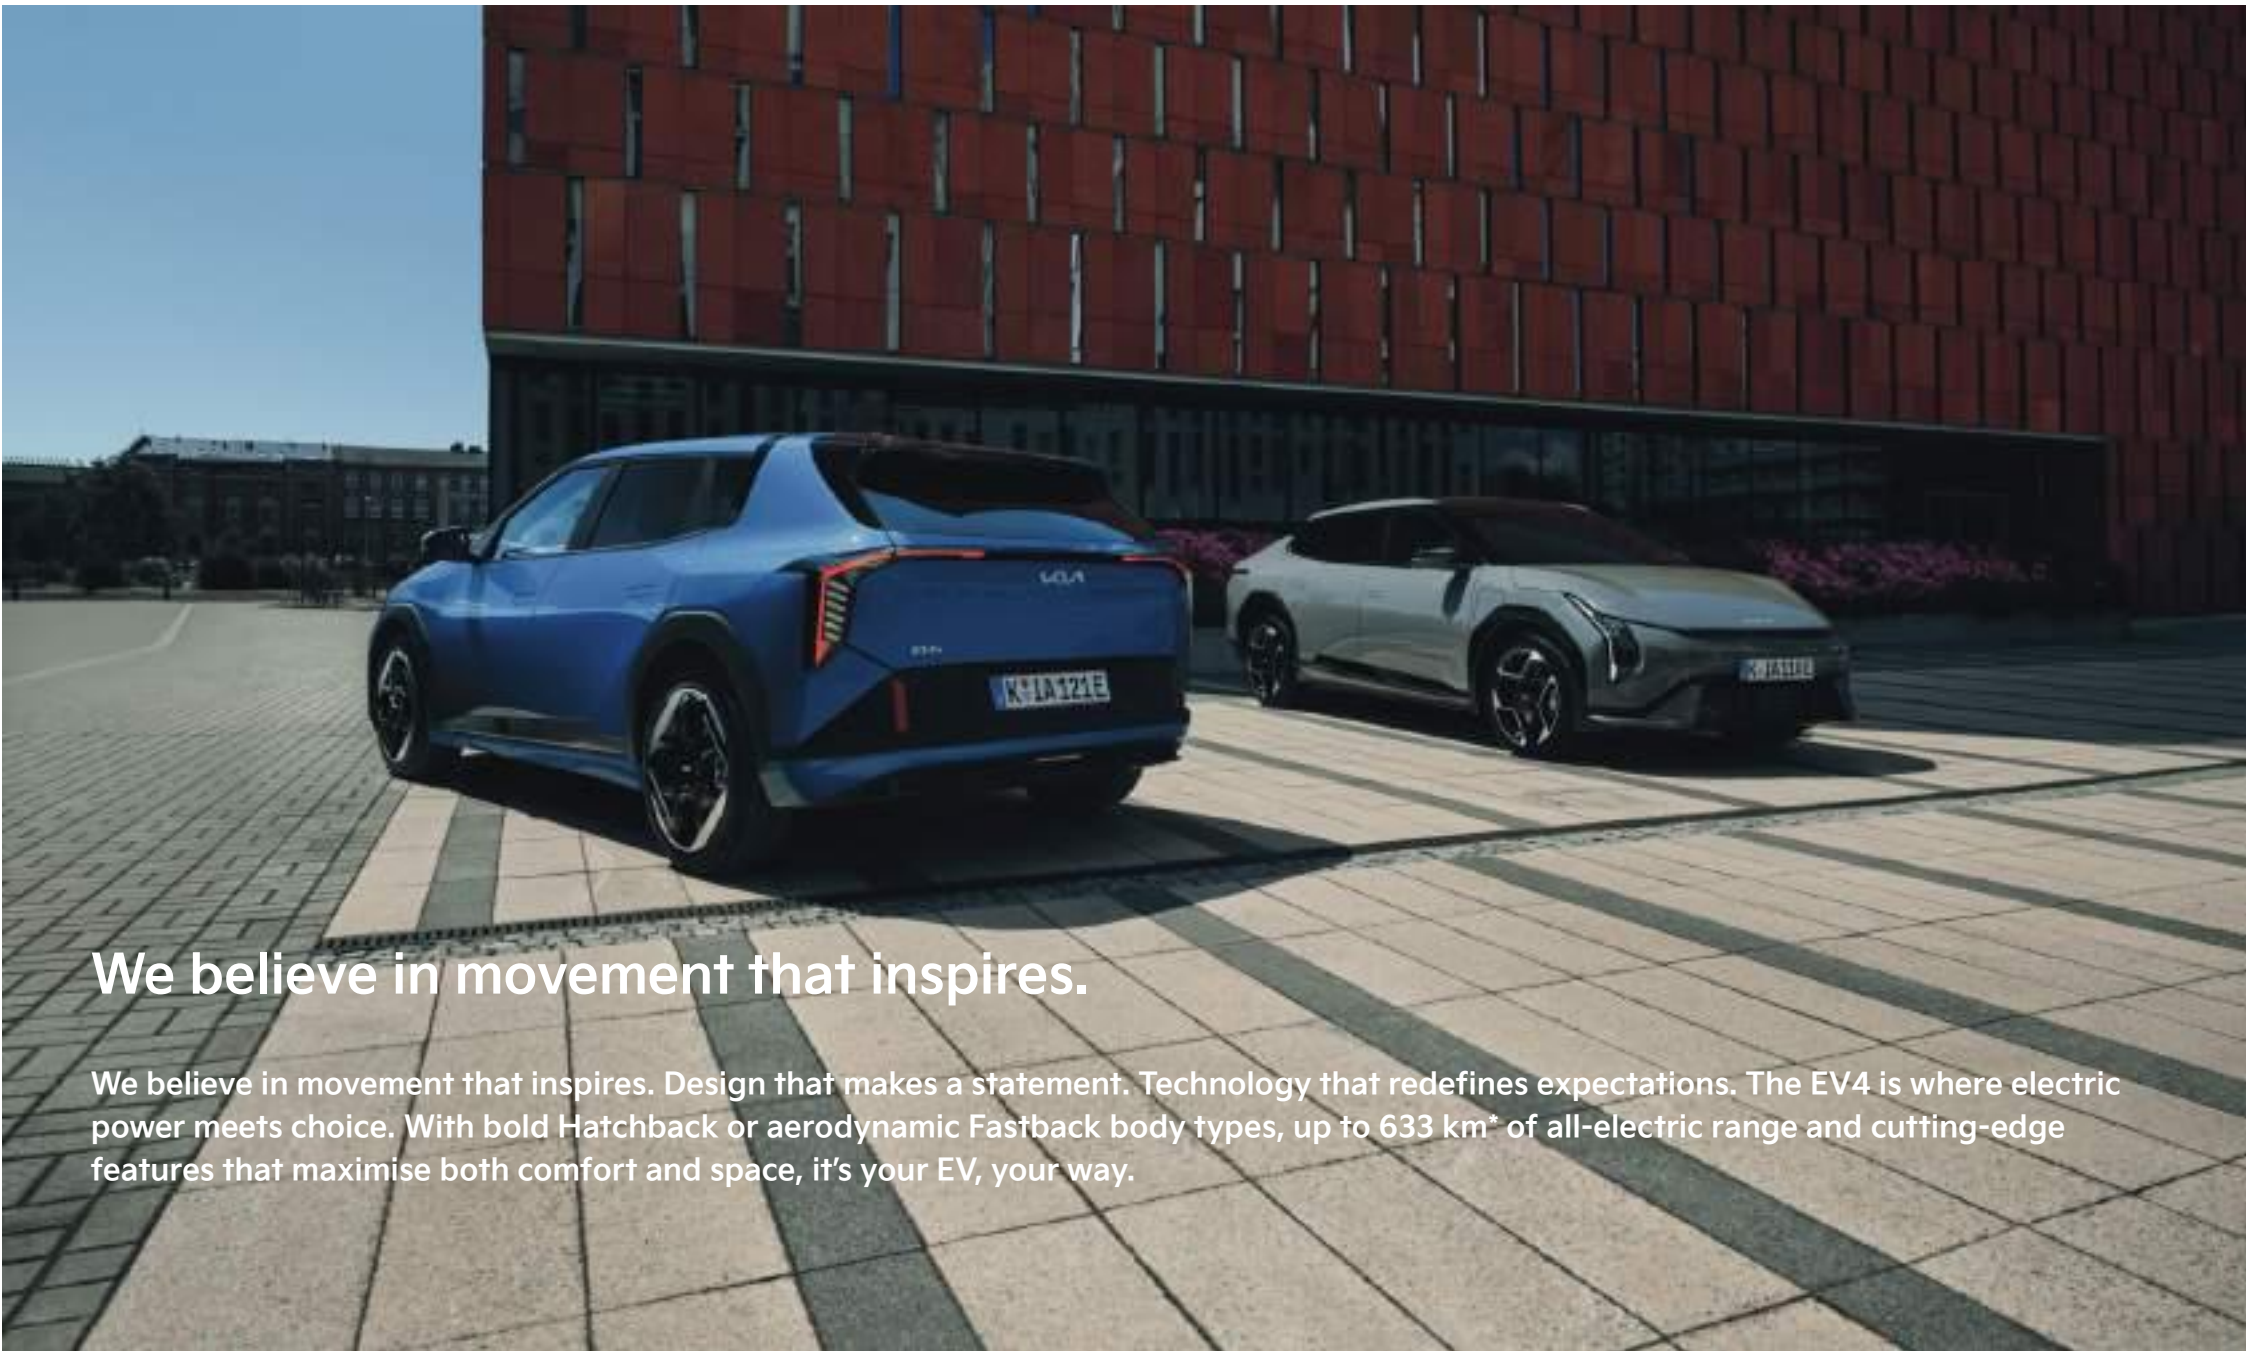

Movement that inspires

Movement that
inspires.

Movement that inspires

We believe in movement that inspires.

We believe in movement that inspires. Design that makes a statement. Technology that redefines expectations. The EV4 is where electric power meets choice. With bold Hatchback or aerodynamic Fastback body types, up to 633 km* of all-electric range and cutting-edge features that maximise both comfort and space, it's your EV, your way.

Exterior

Make your presence known.

Modern, clean proportions.

Stand out with a bold, edgy stance thanks to the EV4's wide shoulders, vertical headlamps, and sleek EV Tiger Face.

Sleek and dynamic in profile.

The athletic silhouette flows with sharp lines, flush door handles and a bold black roof detail.

Wireless smart phone charger. The EV4 makes sure everyone on board enjoys all-round convenience at all times. The wireless charger is located on the central console for front passengers.

Digital Key 2.0. Add even more convenience to your journeys with the Kia Digital Key. It allows you to access and start your EV4 using your smartphone. You can store the key in your digital wallet and share it with multiple drivers for easy access to the car - without having to reach into your pocket for your phone.

USB-C fast charging ports. Convenience is important for everyone on board. You will find handy, fast-charging USB-C ports conveniently located for both front and back passengers.

Entertainment packages. Transform your infotainment with Netflix, YouTube, and more.

Over-the-Air (OTA) Updates	√	√	√

Driver Assistance & Safety

Made for your protection.

Made for your protection.

Equipped with advanced driver assistance features, the EV4 is built to make every journey safer and more enjoyable. Anti-collision Assistance detects risks before they occur. The Highway assistant keeps you safe at higher speeds. And the parking assistant makes parking easier.

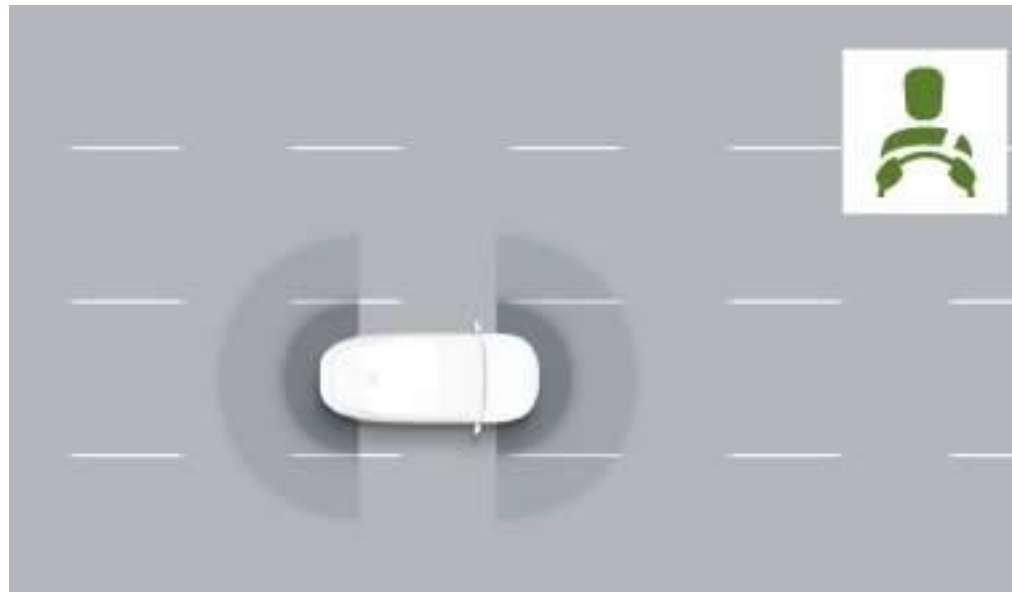

Blind-Spot Collision-Avoidance Assist.

When you signal a lane change, you are warned if a risk of collision is detected with a vehicle beside you or approaching from the rear. The system even interacts with your steering if the risk increases. Blind-Spot Collision-Avoidance Assist also watches out for you when pulling out of parallel parking spaces, warning you about oncoming traffic behind you.

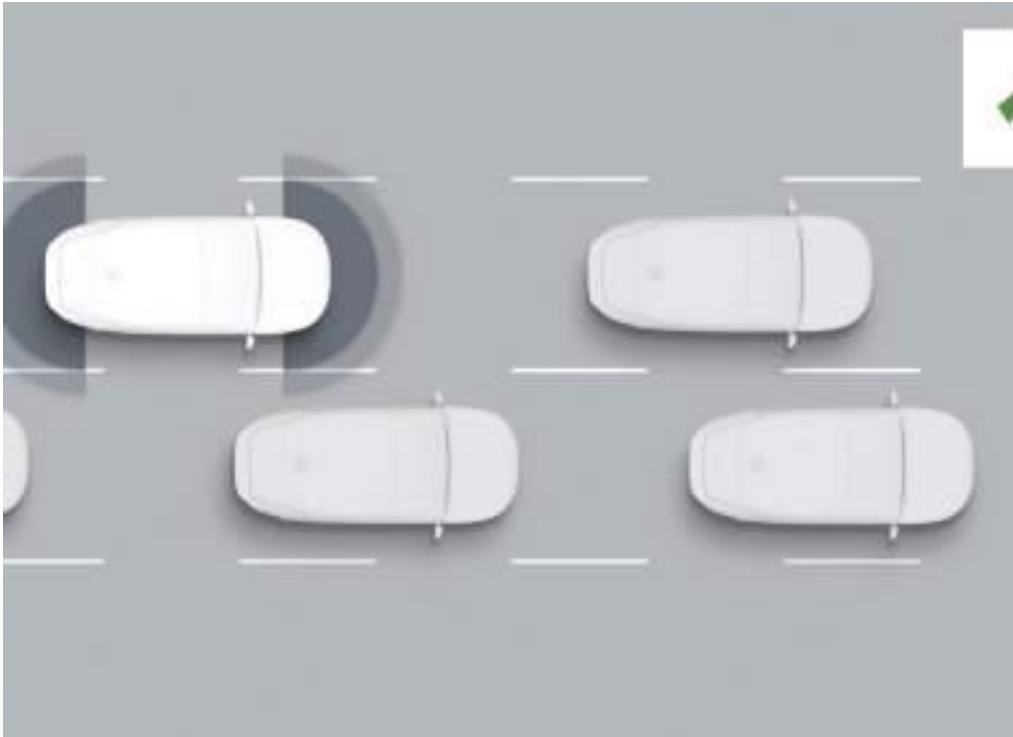

Forward Collision-Avoidance Assist 2.0.

FCA 2.0 gives you added peace of mind and helps you to avoid any potential collisions with pedestrians, cyclists and other cars on the road. If you are not applying the brakes hard enough to avoid collision, your EV3 will do it automatically. This technology also helps you avoid collisions with an oncoming vehicle while turning at an intersection or crossing it, as well as in other driving scenarios.

Smart Cruise Control 2. This technology helps to maintain a safe speed according to road conditions while driving on a motorway. It automatically reduces the speed in sections of motorways with tight curves, in order to keep the driver and passengers safe. And it resumes acceleration to pre-set levels thereafter.

Highway Driving Assist 2 with Hands-On Detection. HDA 2 with HoD automatically adapts your target speed to meet the limit, while keeping you at a safe distance from the vehicle ahead. The upgraded hands-on detection sensors on the steering wheel detect whether you are touching it, even without movement. HDA 2 is even capable of changing lane automatically when you use the side indicator.

Lane Following Assist monitors the lane markings and/or vehicles in front on the road, and assists your steering if necessary to help your EV3 centered in its lane. This also features Hands-On Detection (HoD) sensor, which detects if you let go of the steering wheel for several seconds and activates a warning signal to remind you to place your hands back on.
