Where? When? How?

The answer is here.

Our new navigation system with Kia's Connected Services powered by TomTom takes reliable route guidance to the next level of accuracy and excellence. It keeps you in touch with the outside world and offers more handy information than ever. At the heart is a Wi-Fi unit that enables the all-new Picanto's navigation system to connect to the Internet through your smartphone.*

Kia's innovative hotspot app uses your Android phone's Bluetooth to detect when a Kia navigation system is in range. It then switches on the hotspot to connect to the navigation system's Wi-Fi, and turns it off again when the communication with the car is interrupted or stopped – making it even more convenient to use Kia's Connected Services. Please note, this is only available on the GT Line.
